Airbus A380
9H-MIP

Max Range
13,300 km

Volume Capacity
342 m³

Max Cargo Capacity
68,000 kg

* Overhead Stowage Compartment
Maximum weight of each compartment/zone might limit the number of boxes or weight per box.

* Overhead Stowage Compartment
The volume mentioned in this document for the different areas and compartments are for illustration purposes only and do not constitute any kind of guarantee or covenant that such volume can be used in full. Box size, shape and weight, as well as the flight duration, can significantly reduce the cargo volume possible to transport on this aircraft. Furthermore, to support the aircraft maintenance and operation, on most flights the carrier might need to carry two FAKs (FLY AWAY KITS) AKEs containers that contains spare parts, tools and consumables and a PMC with a tow bar. This will further reduce the space available for cargo by 20 m³. The price quoted for your flight does not depend on the actual volume carried.
LOWER DECK SECTION
**ULK - UNIT LOAD DEVICE**

**APE-LD3**
- Internal Volume: 4.5 m³
- Max Weight: 1.560 kg

**P6P-PMC**
- Internal Volume: 11 m³
- Max Weight: 5.100 kg

**P1P-PAG**
- Internal Volume: 10 m³
- Max Weight: 4.636 kg
